SUMMARY

I am a passionate and fast learner with hands-on experience of 6+ years in programming and software development. I have extensive knowledge and experience of 7+ years in Computer Science, Computer Technologies and Applications. I am proficient in Python, MongoDB, Data Structures and Algorithms, SQL, HTML, CSS, JavaScript, Docker, Arduino, Web Applications and Linux Systems.

EXPERIENCE

Pokétwo *Software Developer, Administrator*
<https://github.com/poketwo/poketwo>

August 2023 - Present

- Developed and enhanced *Pokétwo*, a widely popular online text-based chatbot game with active participation from over **5.5 million users** and more than **1.4 million online communities**.
- Utilized Git version control system to store and manage open-source source code, pushing **400+ commits** and creating **150+ pull requests**, almost all of which were approved and merged.
- Utilized *discord.py* for efficient asynchronous connection with the *Discord API*, *MongoDB* for robust data management and *Redis* for caching and optimizing purposes for **50,000+** simultaneous players.
- Played a pivotal role in the growth of *Pokétwo* by consistently delivering high-quality code, implementing **15+** major and **35+** other features and improvements, and fixing **10+** critical and **40+** other bugs and issues, among many other improvements of speed, efficiency and user-experience, involvement in implementation of new features and solutions to various problems.
- Successfully collaborated with the development, administration and event management teams to implement new features, resolve technical issues, and improve gameplay and user-experience.

PROJECTS

Yeet. *Python · Discord API · Git · Pandas · NumPy · Docker*
<https://github.com/witherredaway/yeet>

May 2021 – Present

- Created multi-purpose and entertainment bot for popular online chat platform *Discord*, enabling **over 3,200 users** across **100+ online communities** to connect and interact, pushing **over 1,000 commits** to the GitHub source code repository.
- Containerized and deployed the application with *Docker* ensuring seamless compatibility and functioning of resource-intensive processes and algorithms used by core features of the bot.
- Implemented **10+** major and **30+** other features and enhancements and fixed **20+** critical and **40+** other bugs and glitches, along with brainstorming, design and building of the UI/UX.
- Designed and built a unique and fully-featured pixel art tool directly accessible through chat utilizing 2D Matrices, complex algorithms and advanced concepts of OOP (Object Oriented Programming) to provide a fun platform to create and share pieces of art, and a fully functional calculator, utilizing OOP (Object Oriented Programming) and concepts of DSA (Data Structures and Algorithms).

gists.py *Python · GitHub API · Git*
<https://github.com/witherredaway/gists.py>

March 2022 - Present

- Created public open-source asynchronous API wrapper for the *GitHub Gists API* using Python and *aiohttp* for a fast and efficient connection and interaction with the API.
- Packaged and published a fully-functional public code library through The Python Package Index, allowing users to install and use the package with ease and no obstacles.

Arduino Projects *C++ · Arduino*

July 2024 - Present

<https://github.com/WitherredAway/arduino-projects>

- Built an assortment of Arduino projects for hardware development and prototyping, ranging from beginner to advanced levels such as *Live Temperature & Humidity Monitoring System*, *Wi-Fi server using ESP8266 to control devices from a website on any device*, *Lighting system using LED arrays*, etc.

Google Developer Groups (GDG) Web Development *HTML · CSS · JavaScript*

November 2024 - Present

<https://witherredaway.github.io/gdg-web-dev/purem-oda>

<https://github.com/WitherredAway/gdg-web-dev/tree/main/purem-oda>

- Created via replication a fully responsive dummy web page and enhanced the design with modern design techniques such as Neumorphism and Glassmorphism.

TECHNICAL SKILLS

Programming Languages

- *Python* *Data Structures & Algorithms · Web Backend · Game Development · Home Control · API Development · Pandas · NumPy · Pillow · Matplotlib*
 - *Pokétwo*, a Discord bot game based on the popular game and show franchise Pokémon
 - *Pokétwo Image Server*, backend for image manipulation API
 - *gists.py*, an Asynchronous API Wrapper for the GitHub Gists API
 - *Yeet.*, a multi-purpose Discord bot with fun and useful utility functions
- *C++*, *Arduino* *Data Structures & Algorithms · Hardware Development & Prototyping*
 - *Temperature & Humidity Monitoring System · Wi-Fi device control · Array lighting system*
- *HTML (markup language)*, *CSS* *Web Development*
 - *Personal Website · Online Text Parsing Tools · GDG Web Development Projects*
- *JavaScript* *Web Development*
- *C* *Data Structures & Algorithms*
- *Bash CLI (Command Line Interface) Scripting*

Database Management: MongoDB · SQL · Redis

Infrastructure and Tools: Docker · Linux · Git · GitHub Actions · Markdown

Other Technologies: NumPy · Pandas · PostgreSQL · MySQL · MongoDB · Redis · Matplotlib · Arduino

SOFT SKILLS

Team Leadership & Management

- Volunteer Moderator and Administrator of Pokétwo online community, managing a team of around **20 moderators**, managing an online community of over **250,000 members**.
- Software Developer of the Developer Team of Pokétwo, collaborating with and guiding other Developers to ensure a smooth development process.

EDUCATION & CERTIFICATIONS

Techno India University, West Bengal

Computer Science and Engineering, B.Tech.

Aditya Academy Senior Secondary, Kadambagachi

Class 12 Science (PCMCs), AISSCE

Class 10, AISSE

International English Language Testing System (IELTS)

Overall

Listening

Reading

Writing

Speaking

Expected Graduation: August 2028

** currently taking course*

Graduation: April 2024

Grade Percentage: 75%

Grade Percentage: 83%

Result Publication: April 2024
