Summary

Software developer building production systems at Discord scale. Core developer of Pokétwo, an open-source Pokémon game played in **2.3M+ servers**, owning its anticheat stack and contributing to the image-generation service behind its visual commands. **8+ years** of programming across asynchronous Python, machine learning, Kotlin/Android and embedded C++. B.Tech. Computer Science student, 2028.

Experience

Pokétwo *Software Developer, Administrator* August 2023 – Present
github.com/poketwo/poketwo

- Design and ship gameplay features end to end — command flows, interaction design and the generated artwork behind them — for a game in **2.3M+ servers** with **7.7M+ trainers** and **69,000+ daily active players**.
- Built the anticheat system from scratch: a gradient-boosted model over character n-gram language models, scoring **600K+ accounts** and ranking a bot above a real player **97.6% of the time** — bot detection up from **38% to 83%**, false accusations of real players down **8×** to **1%**.
- Contributor to the image service rendering battles, breeding, seasonal events and user-customizable sprites, replacing static assets with a composable *Pillow* pipeline.
- Authored **3,500+ commits** and **700+ pull requests** (**607 merged**) across 8 production repositories: bot, image service, anticheat, data pipeline, deployment manifests.
- Cut database load on high-traffic commands with *Redis* caching and rewritten *MongoDB* queries and indexes; ship through *Docker* and *Kubernetes*.

Projects

Notification Mirror · Camera Remote *Kotlin · Jetpack Compose · Wear OS* February 2026 – Present
github.com/WitherredAway/NotificationMirror

- Shipped two Wear OS apps — notification mirroring with reply and action support, and a remote driving any phone camera app over the accessibility API — to **35 stars** and **1,200+ downloads**.

Yeet. *Python · discord.py · Docker · Pillow · NumPy* May 2021 – Present
github.com/witherredaway/yeet

- Sole author of a multi-purpose Discord bot across **890+ commits**, centred on a chat-native pixel art editor built on 2D matrices and an object-oriented rendering pipeline.

gists.py *Python · aiohttp · GitHub API* March 2022 – Present
github.com/witherredaway/gists.py

- Asynchronous wrapper for the GitHub Gists API, published to PyPI with documentation.

Technical Skills

- **Python** *async services · Discord and REST APIs · Pandas · NumPy · Pillow · Matplotlib*
- **Machine Learning** *gradient boosting · feature engineering · held-out evaluation · PyTorch · scikit-learn · SciPy*
- **Kotlin, Android** *Jetpack Compose · Wear OS · Java (learning)*
- **C, C++, Arduino** *data structures and algorithms, linear and non-linear · ESP8266 prototyping*
- **Web** *HTML · CSS · JavaScript · Svelte — personal site, GDG projects, guitar tab player*
- **Data & Infrastructure** *MongoDB · Redis · PostgreSQL · MySQL · Docker · Kubernetes · Linux · Git · GitHub Actions · Bash · agentic AI workflows*

Leadership

- Administrator of the Pokétwo community: lead **20 moderators** serving **345,000+ members**, set policy and handle escalations; mentor developer-team contributors through code and design review.

Education & Certifications

Techno India University, West Bengal **Expected Graduation**: August 2028
B.Tech., Computer Science and Engineering *currently enrolled*
Aditya Academy Senior Secondary, Kadambagachi **Graduation**: April 2024
Class 12 Science (PCM + Computer Science), AISSCE — 75% · Class 10, AISSE — 83%
IELTS *Listening 9.0 · Reading 8.5 · Writing 7.0 · Speaking 7.0* **Overall Band Score**: 8.0 (April 2024)
