SUMMARY

Self-taught software developer with 6+ years of programming experience, currently building **Pokétwo**, an open-source Discord game serving 5.5M+ players. Comfortable across asynchronous Python services, MongoDB and Redis at scale, Docker deployments and Linux tooling. B.Tech. Computer Science student shipping production open-source software.

EXPERIENCE

Pokétwo *Software Developer, Administrator*
github.com/poketwo/poketwo

August 2023 – Present

- Ship features and fixes for a text-based game with **5.5M+ registered users** across **1.4M+ Discord servers**, peaking at **50,000+ concurrent players**.
- Authored **400+ commits** across **150+ pull requests** — **15 major and 35 minor features**, plus **10 critical and 40 routine defect fixes** — nearly all reviewed and merged.
- Cut database load on high-traffic commands by adding *Redis* caching and tightening *MongoDB* queries and indexes.
- Scope features, triage incidents and roll out gameplay changes with the development, administration and event teams.

PROJECTS

YeeT. *Python · discord.py · Docker · Pandas · NumPy · Pillow*
github.com/witherredaway/yeeT

May 2021 – Present

- Built and maintain a multi-purpose Discord bot used by **3,200+ users** in **100+ servers**, with **1,000+ commits**, **10 major features** and **20 critical bug fixes** to date.
- Designed a chat-native pixel art editor on top of 2D matrices and an object-oriented rendering pipeline, letting users draw and share art without leaving Discord.
- Containerized the bot with *Docker* so CPU-heavy image and matrix operations behave identically in development and production.

gists.py *Python · aiohttp · GitHub API*
github.com/witherredaway/gists.py

March 2022 – Present

- Wrote an asynchronous API wrapper for the GitHub Gists API using *aiohttp*.
- Published the library to *PyPI* with documentation, so it installs with a single `pip install`.

Arduino Projects *C++ · Arduino · ESP8266*
github.com/WitherredAway/arduino-projects

July 2024 – Present

- Prototyped embedded projects including a live temperature and humidity monitor, an ESP8266 Wi-Fi server for browser-based device control, and an LED array lighting system.

GDG Web Development *HTML · CSS · JavaScript*
witherredaway.github.io/gdg-web-dev/purem-oda

November 2024 – Present

- Recreated a production landing page as a fully responsive layout, extending it with neumorphic and glassmorphic styling.

TECHNICAL SKILLS

- Python** *async services · Discord and REST APIs · Pandas · NumPy · Pillow · Matplotlib*
Pokétwo · Pokétwo Image Server, an image manipulation API · gists.py · YeeT.
- C, C++, Arduino** *data structures and algorithms · hardware prototyping*
- Web** *HTML · CSS · JavaScript — personal site, text parsing tools, GDG projects*
- Databases** *MongoDB · Redis · PostgreSQL · MySQL · SQL*
- Infrastructure** *Docker · Linux · Git · GitHub Actions · Bash scripting*

LEADERSHIP

- Administrator of the Pokétwo community: lead a team of **20 moderators** serving **250,000+ members**, setting policy and handling escalations.
- Mentor contributors on the Pokétwo developer team through code review and design discussion.

EDUCATION & CERTIFICATIONS

Techno India University, West Bengal
B.Tech., Computer Science and Engineering

Expected Graduation: August 2028
currently enrolled

Aditya Academy Senior Secondary, Kadambagachi

Graduation: April 2024

Class 12 Science (PCM + Computer Science), AISSCE — 75% · Class 10, AISSE — 83%

IELTS *Listening 9.0 · Reading 8.5 · Writing 7.0 · Speaking 7.0*

Overall Band Score: 8.0 (April 2024)
